MOZO

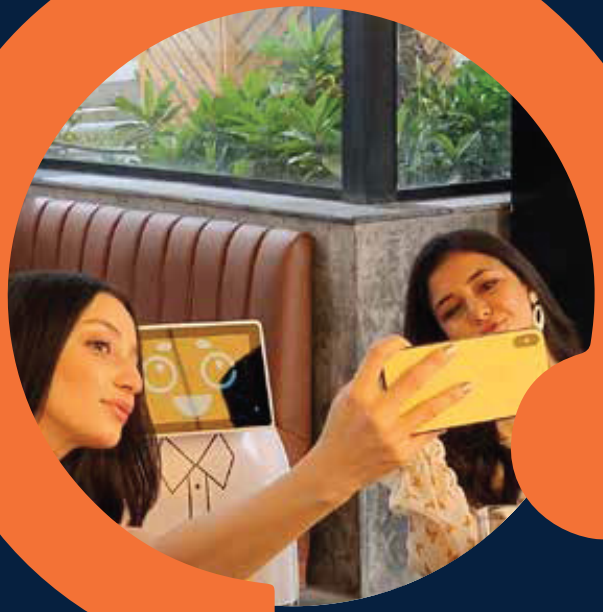
THE SMART

WAITER ROBOT

ABOUT MOZO

Let's agree that people nowadays seek the experience more than anything else, and we are not talking here about enhancing the experience or upgrading it, we're changing the whole game, and giving you an opportunity to win it

Mozo is an innovative functional robot that can act as an Interactive Smart Waiter Robot, that can carry out reception duties, show menu & recommend dishes, deliver food and drink, and provide consultative and informative explanations, to give your guests an unforgettable experience.

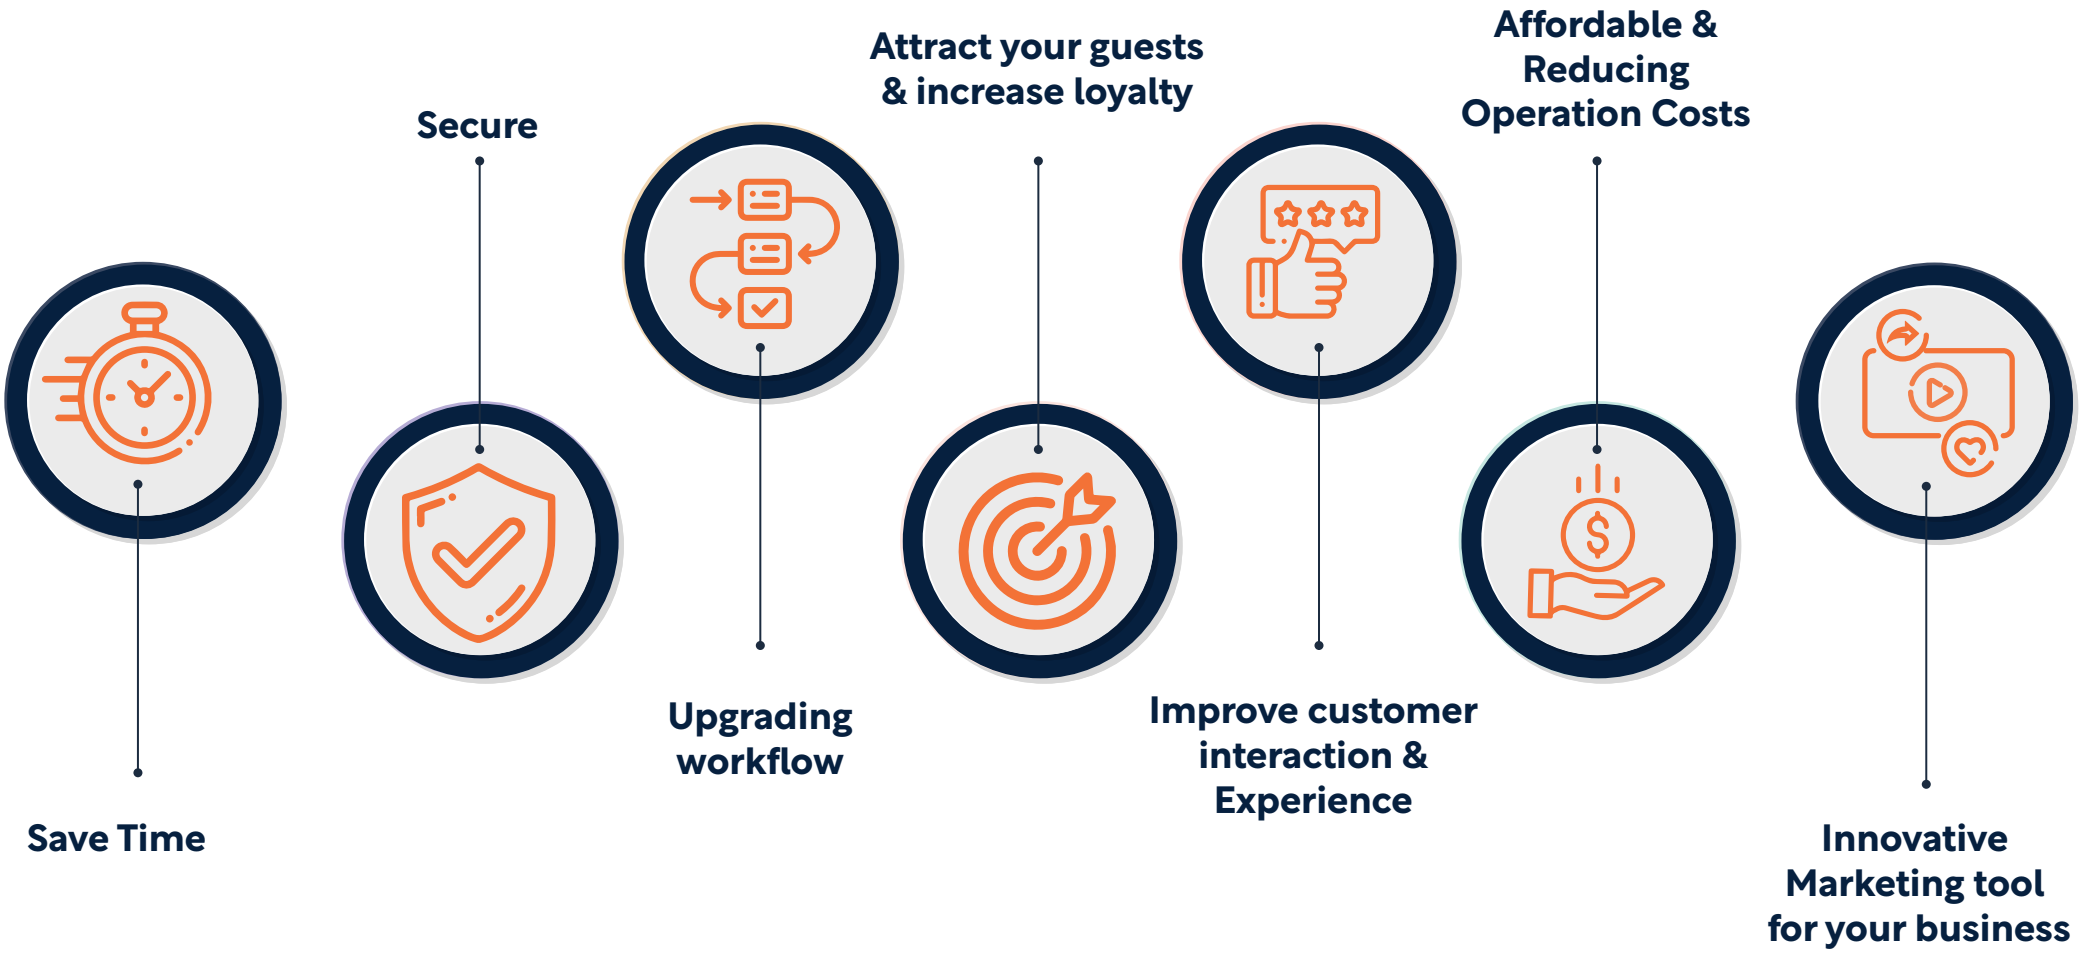


GUEST'S EXPERIENCE WITH MOZO

MOZO LETS YOUR STAFF FOCUS ON:

- Customer satisfaction
- Time providing service
- Addressing diner's needs
- Improving customer service
- Reducing wait time

BENEFITS OF USING MOZO



MAIN FEATURES OF MOZO

MOZO THE CONTACTLESS WAITER

Mozo is created for food running. The self-driving robot efficiently delivers food from the kitchen to your customers.
It is mandatory to use a nonhuman-to-human delivery to keep distance and ensure your safety, as it always comes first.

SAFE MANEUVERS IN A POPULATED WORKSPACE

The robot is designed to operate among people and maneuvers safely & efficiently in even highly dynamic environments.

NAVIGATION & LOCALIZATION WITH HIGH ACCURACY

The robot autonomously navigates to find the most efficient path to its destinations. Mozo adjusts the path when it encounters obstacles that are not on the map with real-time positioning.

AUTOMATIC DECELERATION FOR OBJECTS

The built-in sensors ensure that the robot is slowed down when obstacles are detected in front of it.

EFFICIENT DELIVERY OF ORDERS

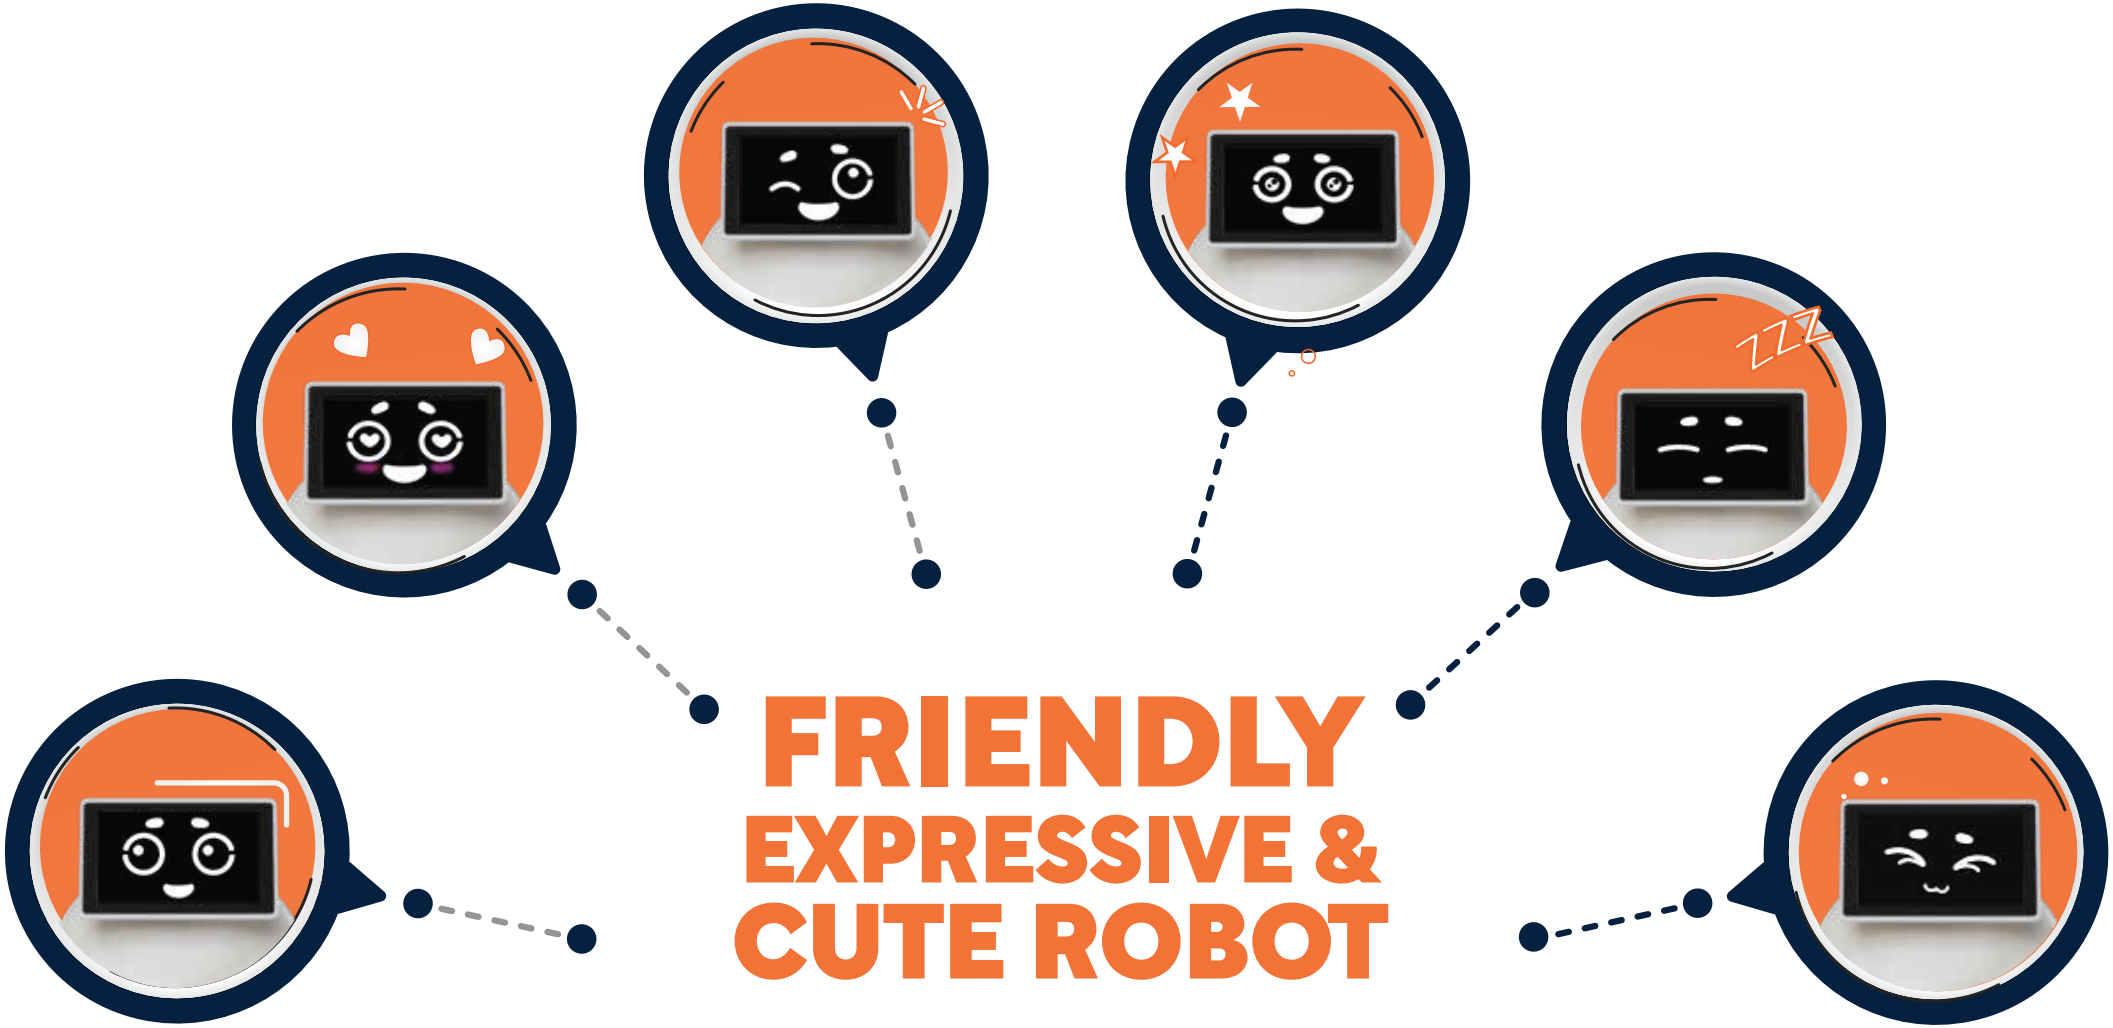
Say goodbye to balancing a tray full of drinks. Mozo's smooth driving ability means it can deliver several beverages at once. The robot is designed to automate order deliveries across tables, allowing employees to focus on higher-value activities

FAST FOOD DELIVERY

According to the tray's capacity and the robot speed you can deliver a variant of dishes with beverage at once to save your time.

WALK LESS, LIFT LESS, AND EARN MORE!

Achieve your waiter delivery targets with Mozo, as servers walk 5-9 miles a day running food.
Our robots afford servers time and energy toward better customer service.



FRIENDLY EXPRESSIVE & CUTE ROBOT

Take your guests' attention with his cute expressions and attractive sound with lights indicators for each state of the robot.

INTERACTIVE SCREEN

Mozo welcomes your guests with his cute expressions then explain them the menu and demonstrate the recommended dishes according to their choices.

USER FRIENDLY & FLEXIBLE

The operator dashboard can be accessed from a PC, tablet, or smartphone. It gives easy access to operation & monitoring of the robot

CUSTOMIZATION

You can customize both the screen & the appearance of the robot for more branding to your restaurant.

MEASURE HOW SATISFIED YOUR GUESTS ARE

For more improvement in your restaurant, you always need to take feedback from your clients, so what do you think about automatic and interactive feedback that Mozo can collect from your guests?
Asking your guest about the service and more than collecting data, Mozo gives them a feeling that you always care about their opinion, as well,
Mozo emotionally interacts with their replies.

TECHNICAL SPECIFICATIONS

WEIGHT (WITHOUT LOAD): **40 KG**

GROUND CLEARANCE: **50 MM / 2 IN**

COLOR: CUSTOMIZED

SPEED AND PERFORMANCE

Battery running time: Up to 12 Hours
Maximum speed: 0.5 m/s
Cruise Speed: 0.3-0.5 m/s Adjustable

SOFTWARE

Operating system: Windows

ENVIRONMENT:

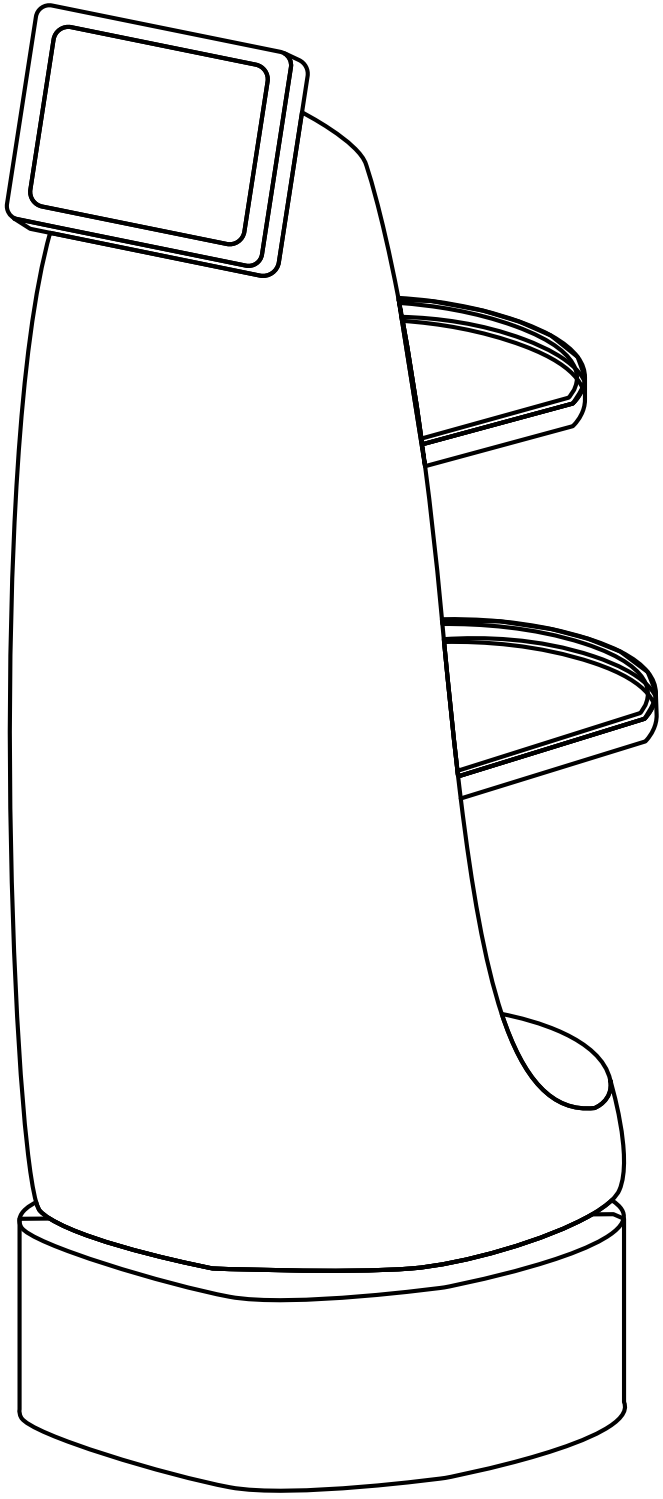
Ambient temperature range:
+5°C to 45°C (humidity 10-95% noncondensing)
Environment: Indoor, Smooth Floor
Minimum corridor width: 0.7 m
Ground clearance: 30 mm

POWER

Battery Capacity: DC 24V
Battery Type: Lithium
Battery Working Hours: Up to 12 Hours
Type of Charging: Manual / Auto Modes
Battery Charging Time: With cable: up to 1.5 Hours
With charging station: up to 3 Hours
Battery Charge Cycles: 600 - 800 cycle
External charger Input: 100-230 V ac, 50-60 Hz
Output: 24 V, max 15 A
Over Charging Cut off: Available
Over Heat Detection: Available

ENVIRONMENT:

Wi-Fi: Dual-band wireless AC/G/N/
Bluetooth: 4.0 LE
I/Os: USB port



SENSOR SYSTEM

Laser Range Scanner: Range: 360°
RGB-D camera: Detection of objects within 10m range
Object detector sensor: Range 20 cm Min., 2000 cm Max

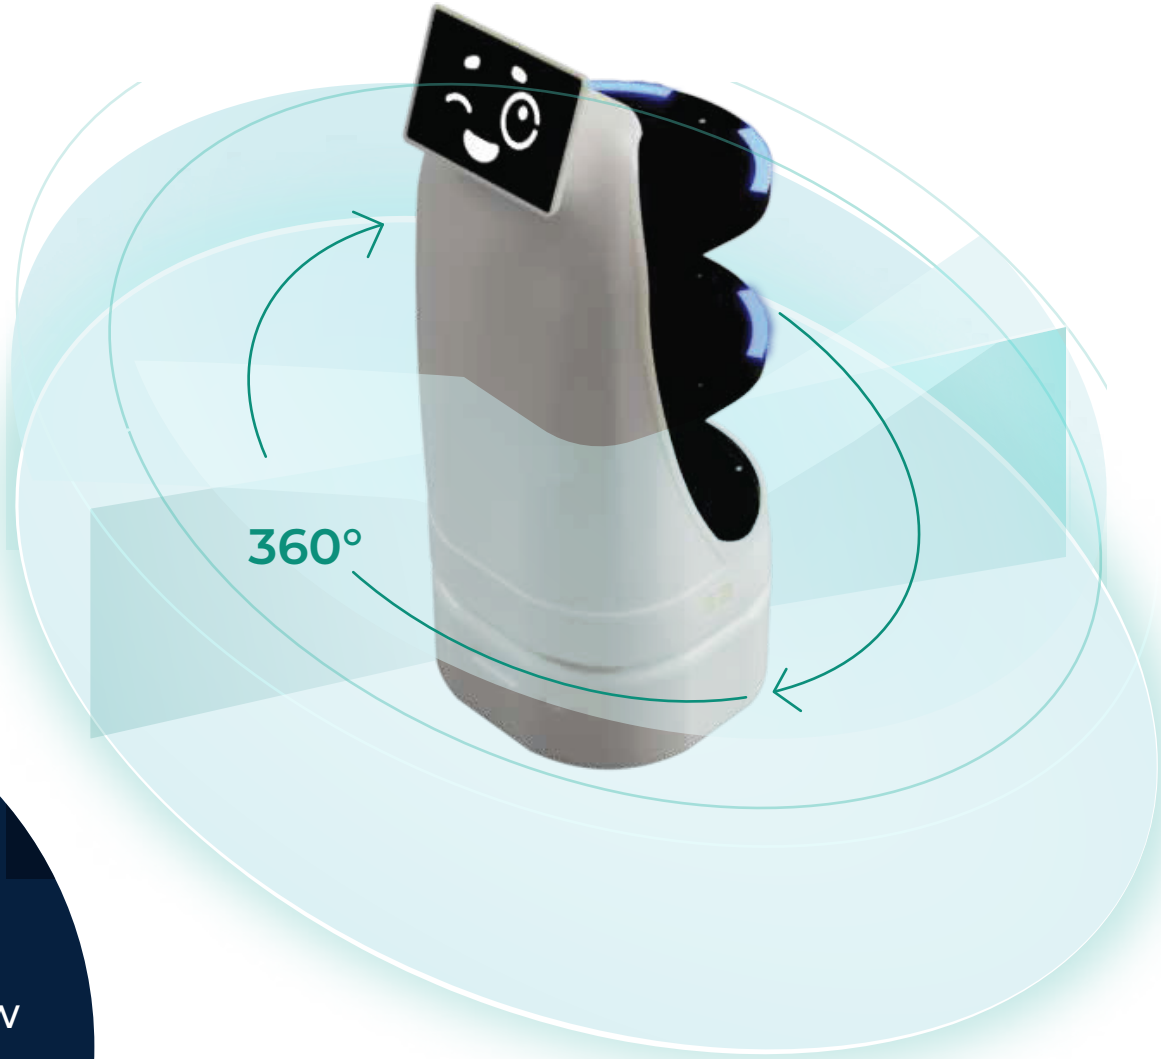
RGB-D CAMERA

Camera positioned on the front of the robot detects objects within 10m range

Signals from the safety laser scanner are combined with input from the camera and other sensors and used to evaluate if an object or person is in the path of travel. In that case, the robot gradually slows down while trying to avoid the obstacle.

OBJECT DETECTOR SENSORS:

Two sensors are placed on the robot: one in each side and used to detect transparent objects



SAFETY LASER SCANNERS:

Safety laser scanner has a 360° field of view with 18m/12m Range Radius around the robot, providing visual protection around the robot.

TRAYS SPECS:

No. of Trays: Three
Tray Load: 4KG/Tray

ROBOT INTERACTION:

Screen: Touch Screen with 10 Inch size
sound: Adjustable
lighting: Interactive lights on each tray
Hover Sensor: Detection Range: 5 - 15 cm

There is a correspondence between the robot modes & the light, sound, and expressions interactions.
Mozo changes his expressions and lights code with efficient sounds according to the situation he intelligently detects in real-time.

SAFETY

Emergency Button: Physical Safety System

COLLISION AVOIDANCE

The collision avoidance safety function ensures that the robot will come to a stop before it collides with a human or object with its 3D intelligent obstacle avoidance technology. In addition, it is automatically deactivated two seconds after the protective field is free.

OVER SPEED AVOIDANCE

The safety system monitors if the speed of each motor is above limits for maximum rated speed and hence an indication of speed control is lost for any reason.

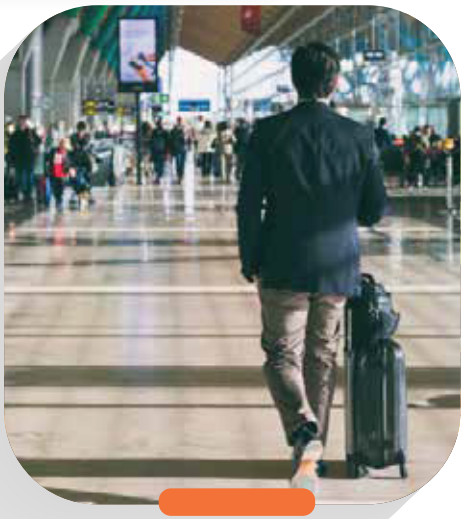
AREAS OF USAGE

Mozo is your key player in different facilities

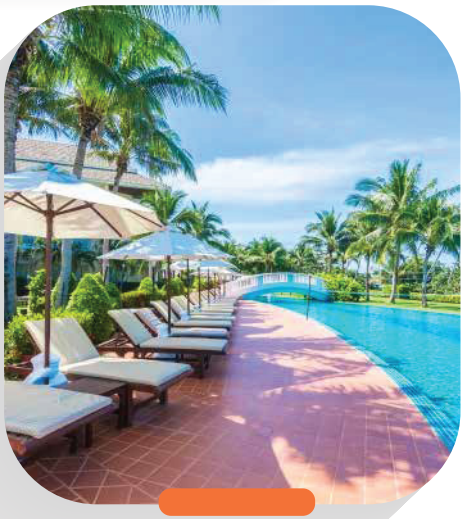
Restaurants

Coffees

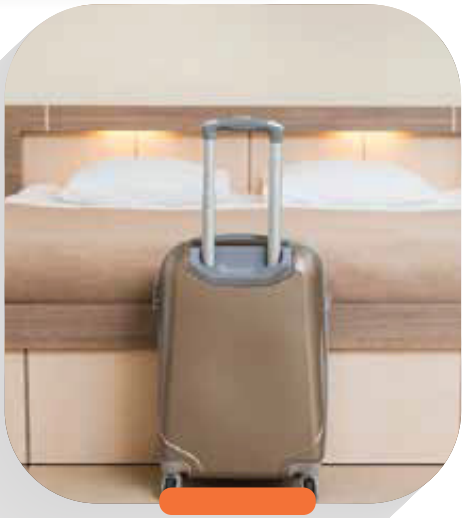
Banks



Airports



Resorts



Hotels
