MOZO

THE OFFICE BOY

ABOUT MOZO THE OFFICE BOY

Let's agree that people nowadays seek the experience more than anything else, and we are not talking here about enhancing the experience or upgrading it, we're changing the whole game, and giving you an opportunity to win it

Mozo the office boy is an innovative functional robot that can act as an Interactive office boy, that can carry out reception duties, show menu & recommend dishes and drinks, deliver, and provide consultative and informative explanations, to give your guests an unforgettable experience.

MOZO THE OFFICE BOY CAN:

- Welcoming and greeting your visitors
- Show a list of complimentary drinks
- Operating 24/7
- Interact with your visitors

BENEFITS OF USING MOZO THE OFFICE BOY

Save Time

Secure

**Upgrading
workflow**

**Innovative
Marketing tool
for your business**

**Improve customer
interaction &
Experience**

MAIN FEATURES OF MOZO THE OFFICE BOY

THE CONTACTLESS OFFICE BOY

MOZO the office boy is created for food and drinks running. The self-driving robot efficiently delivers food and drinks from the kitchen to your visitors. It is mandatory to use a nonhuman-to-human delivery to keep distance and ensure your safety, as it always comes first.

SAFE MANEUVERS IN A POPULATED WORKSPACE

The robot is designed to operate among people and maneuvers safely & efficiently in even highly dynamic environments.

NAVIGATION & LOCALIZATION WITH HIGH ACCURACY

The robot autonomously navigates to find the most efficient path to its destinations. Mozo the office boy adjusts the path when it encounters obstacles that are not on the map with real-time positioning.

AUTOMATIC DECELERATION FOR OBJECTS

The built-in sensors ensure that the robot is slowed down when obstacles are detected in front of it.

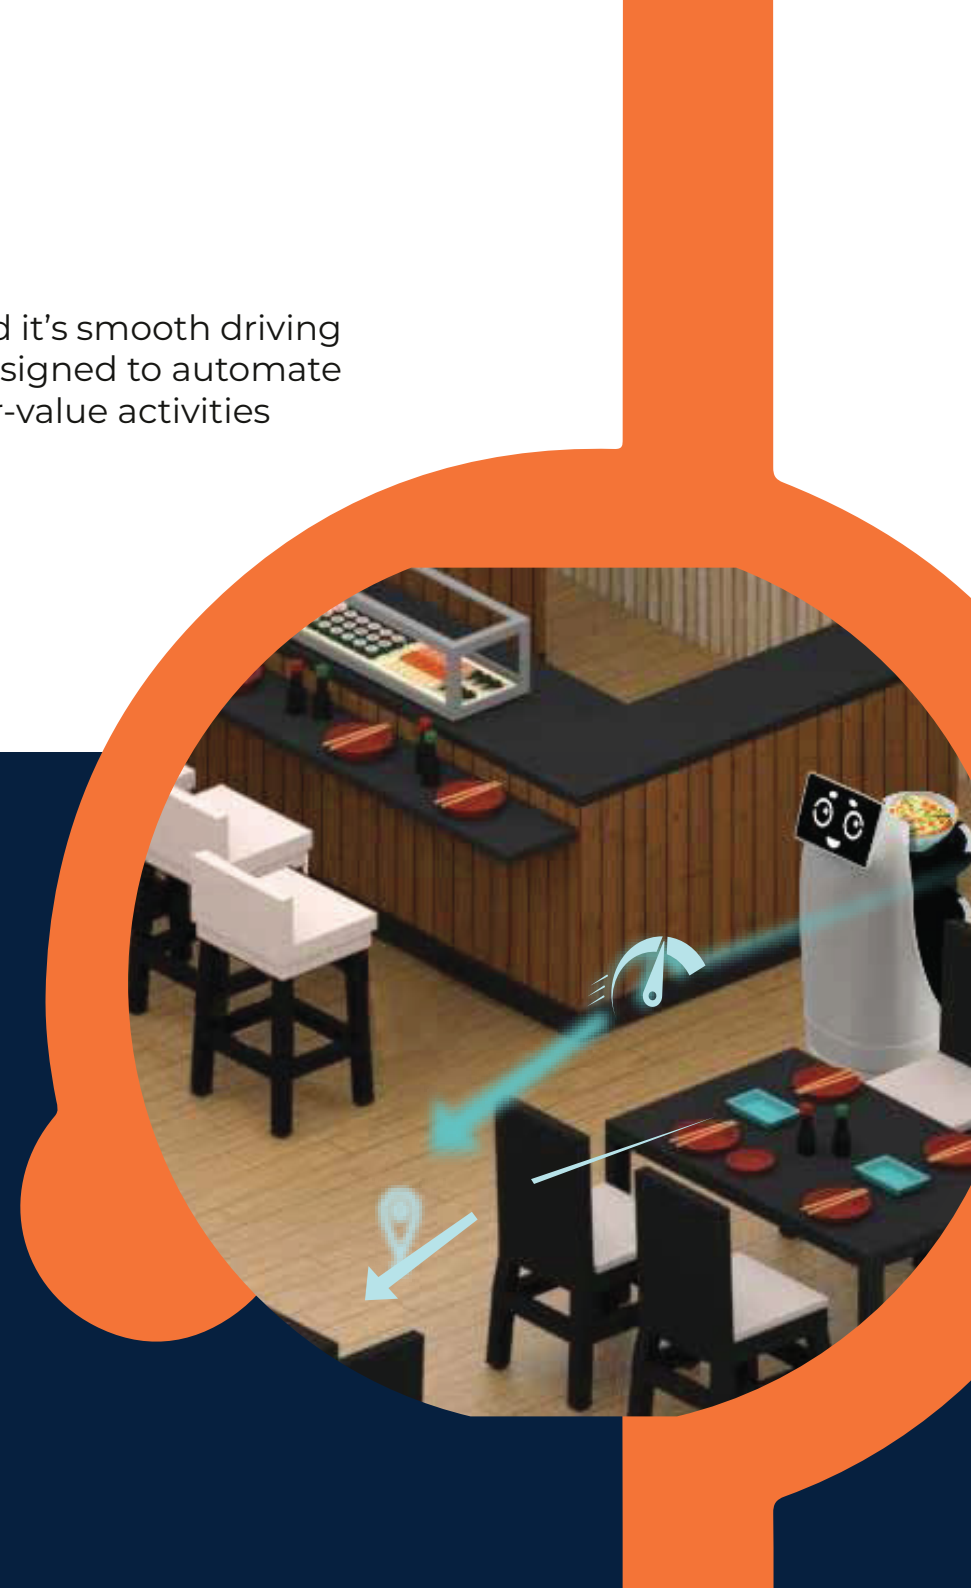

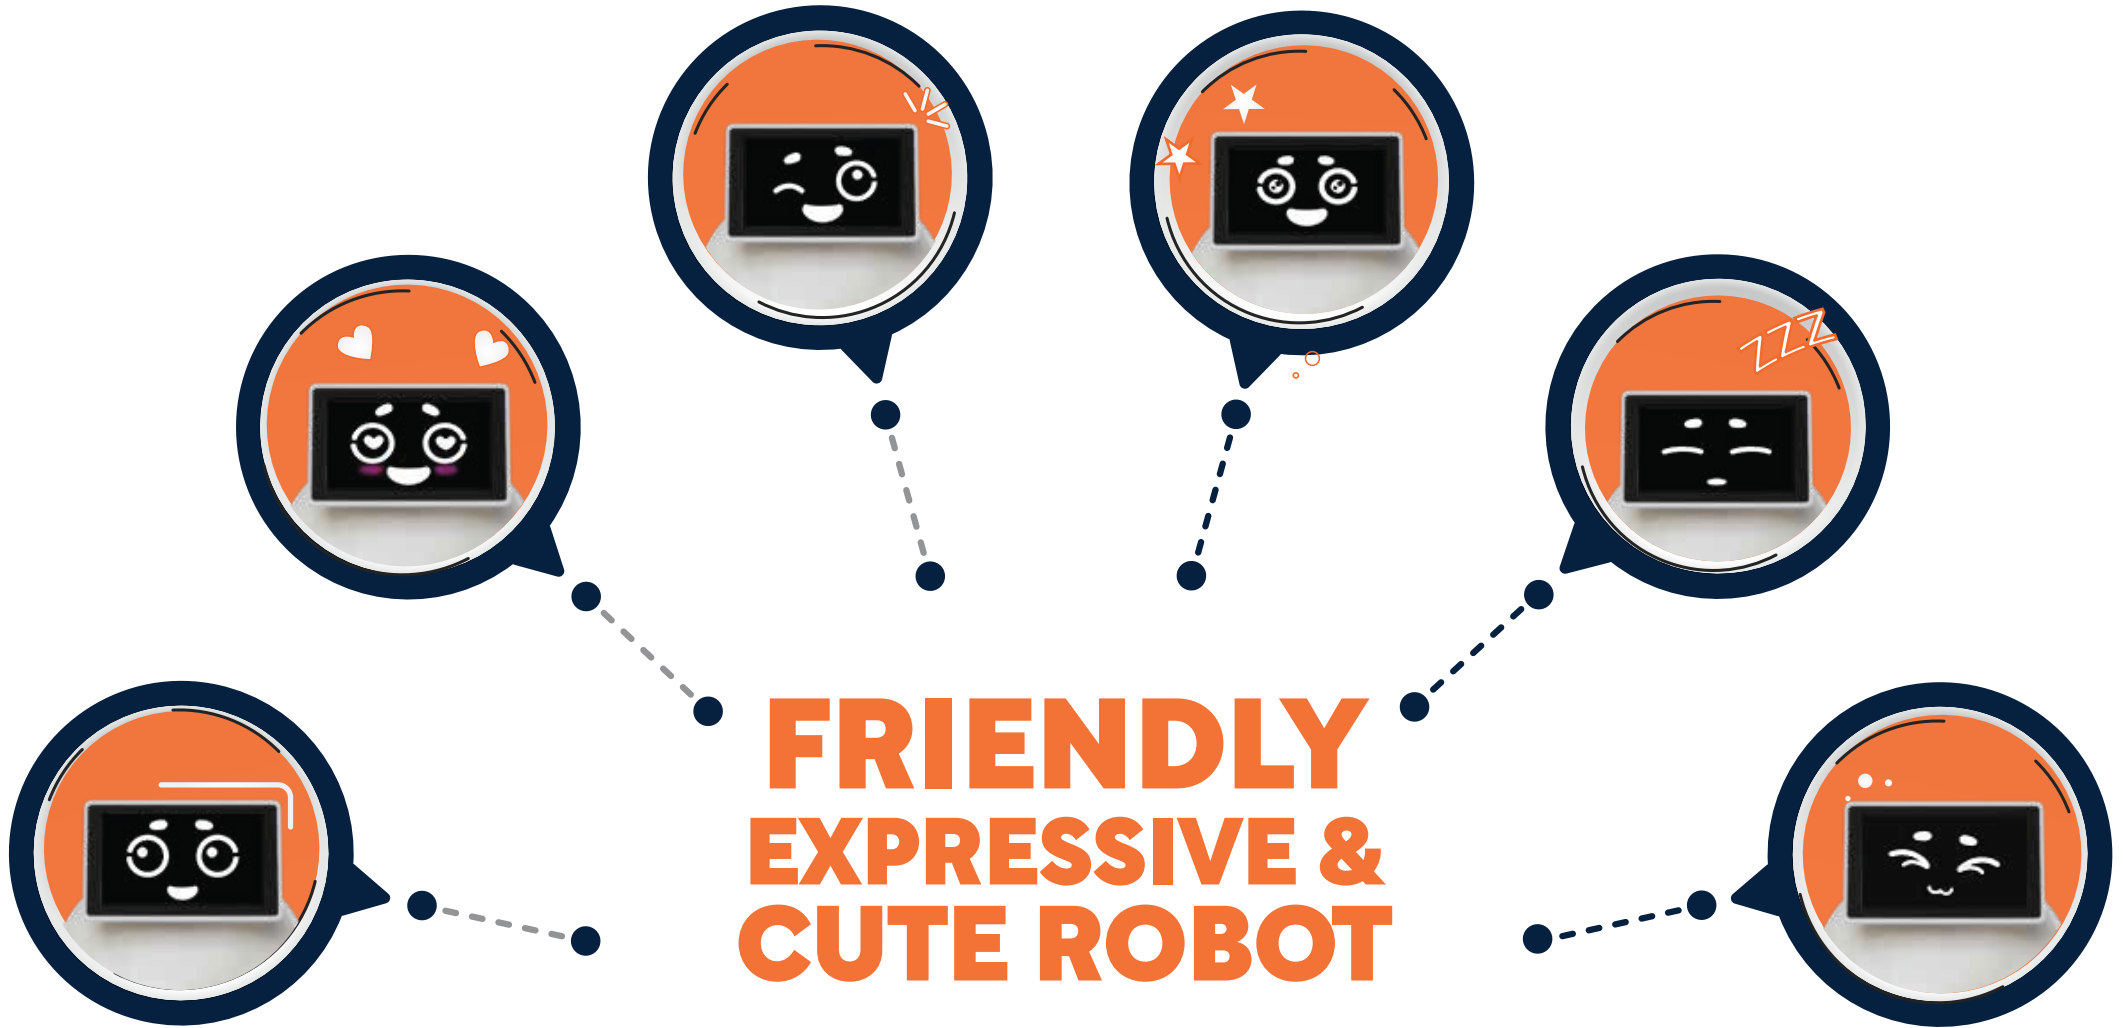

EFFICIENT DELIVERY OF ORDERS

Say goodbye to balancing a tray full of drinks. Mozo the office boy and its smooth driving ability means it can deliver several beverages at once. The robot is designed to automate order deliveries across offices, allowing employees to focus on higher-value activities

FAST FOOD AND DRINKS DELIVERY

According to the tray's capacity and the robot speed you can deliver a variant of dishes with beverage at once to save your time.

Take your guests' attention with his cute expressions and attractive sound with lights indicators for each state of the robot.

INTERACTIVE SCREEN

Mozo the office boy welcomes your visitors with his cute expressions then explain them the menu and demonstrate the recommended dishes and drinks according to their choices.

USER FRIENDLY & FLEXIBLE

The operator dashboard can be accessed from a PC, tablet, or smartphone. It gives easy access to operation & monitoring of the robot

CUSTOMIZATION

You can customize both the screen & the appearance of the robot for more branding to your brand.

TECHNICAL SPECIFICATIONS

WEIGHT (WITHOUT LOAD): **40 KG**

GROUND CLEARANCE: **50 MM / 2 IN**

COLOR: CUSTOMIZED

SPEED AND PERFORMANCE

Battery running time: Up to 12 Hours

Maximum speed: 0.5 m/s

Cruise Speed: 0.3-0.5 m/s Adjustable

SOFTWARE

Operating system: Windows

ENVIRONMENT:

Ambient temperature range:

+5°C to 45°C (humidity 10-95% noncondensing)

Environment: Indoor, Smooth Floor

Minimum corridor width: 0.7 m

Ground clearance: 30 mm

POWER

Battery Capacity: DC 24V

Battery Type: Lithium

Battery Working Hours: Up to 12 Hours

Type of Charging: Manual / Auto Modes

Battery Charging Time: With cable: up to 1.5 Hours

With charging station: up to 3 Hours

Battery Charge Cycles: 600 - 800 cycle

External charger Input: 100-230 V ac, 50-60 Hz

Output: 24 V, max 15 A

Over Charging Cut off: Available

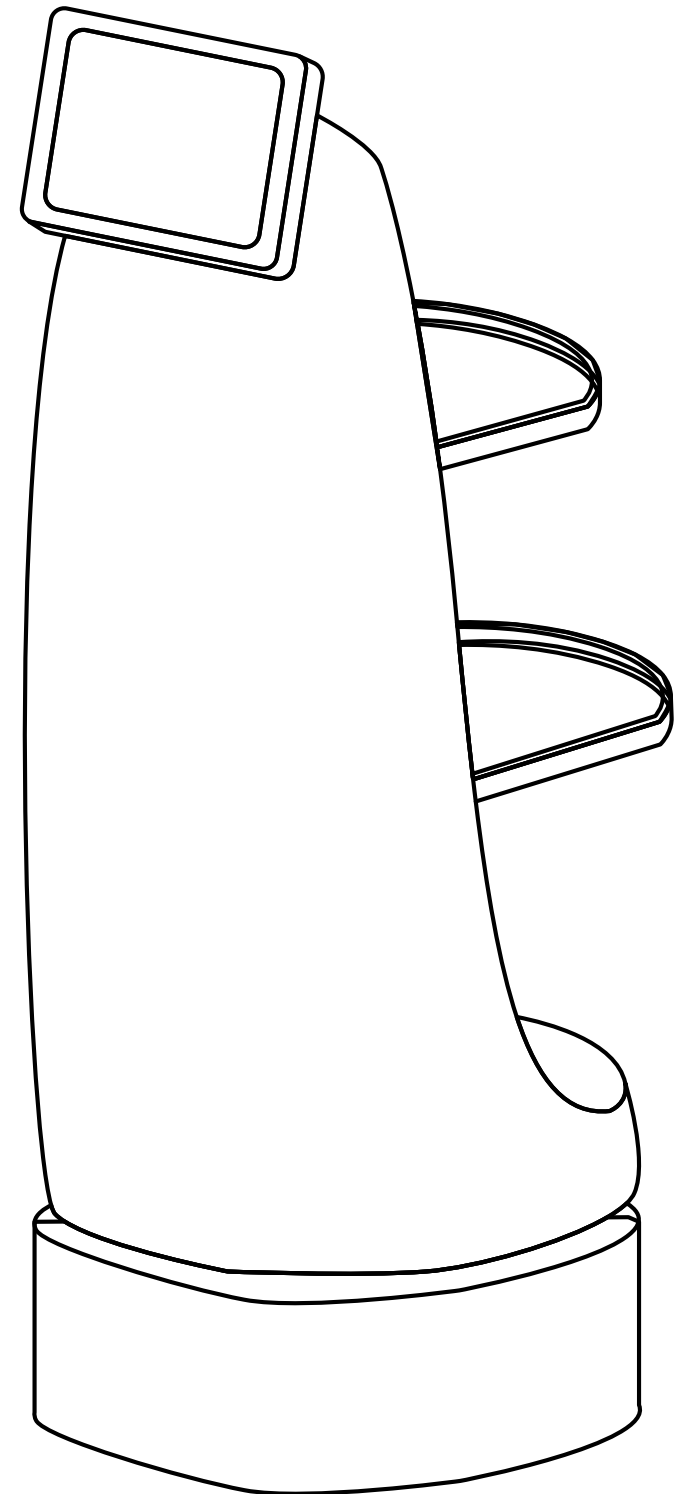

Over Heat Detection: Available

ENVIRONMENT:

Wi-Fi: Dual-band wireless AC/G/N/

Bluetooth: 4.0 LE

I/Os: USB port

SENSOR SYSTEM

Laser Range Scanner: Range: 360°

RGB-D camera: Detection of objects within 10m range

Object detector sensor: Range 20 cm Min., 2000 cm Max

RGB-D CAMERA

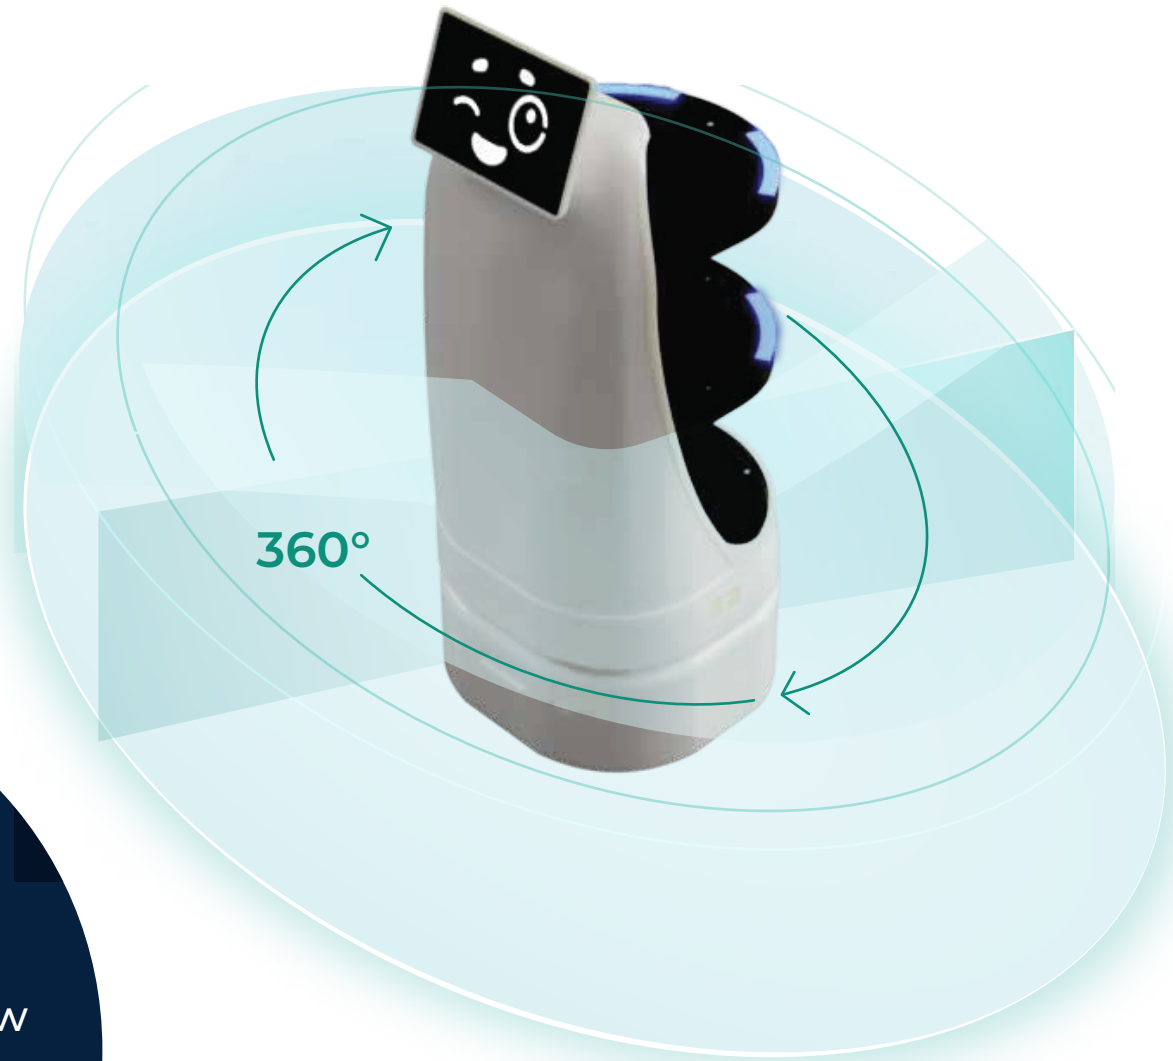

Camera positioned on the front of the robot detects objects within 10m range

Signals from the safety laser scanner are combined with input from the camera and other sensors and used to evaluate if an object or person is in the path of travel. In that case, the robot gradually slows down while trying to avoid the obstacle.

OBJECT DETECTOR SENSORS:

Two sensors are placed on the robot: one in each side and used to detect transparent objects

SAFETY LASER SCANNERS:

Safety laser scanner has a 360° field of view with 18m/12m Range Radius around the robot, providing visual protection around the robot.

ROBOT INTERACTION:

Screen: Touch Screen with 10 Inch size

sound: Adjustable

lighting: Interactive lights on each tray

Hover Sensor: Detection Range: 5 - 15 cm

TRAYS SPECS:

No. of Trays: Three

Tray Load: 4KG/Tray

There is a correspondence between the robot modes & the light, sound, and expressions interactions.

Mozo the office boy changes his expressions and lights code with efficient sounds according to the situation he intelligently detects in real-time.

SAFETY

Emergency Button: Physical Safety System

COLLISION AVOIDANCE

The collision avoidance safety function ensures that the robot will come to a stop before it collides with a human or object with its 3D intelligent obstacle avoidance technology. In addition, it is automatically deactivated two seconds after the protective field is free.

OVER SPEED AVOIDANCE

The safety system monitors if the speed of each motor is above limits for maximum rated speed and hence an indication of speed control is lost for any reason.
